

Project Design Phase-II

Data Flow Diagram & User Stories

DATE	28 SEPTEMBER 2026
TEAM ID	6ab220cfbee0b08a2d2c63cd
PROJECT NAME	AUTO TICKET CLASSIFICATION USING FLOW DESIGNER
MAXIMUM MARKS	4 MARKS

Data Flow Diagrams:

Explanation

1. User creates an incident ticket.
2. Ticket details are stored in the Incident Table.
3. Flow Designer is triggered automatically.
4. Ticket description is analyzed using classification rules.
5. Ticket is categorized as Hardware, Software, Network, etc.
6. Appropriate support team is assigned automatically.
7. Notifications are sent to the assigned team.
8. Reports and dashboards are updated.

User Stories

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
End User	Ticket Creation	USN-1	Create a new incident ticket.	Ticket created successfully.	High	Sprint-1
End User	Ticket Submission	USN-2	Submit ticket through portal.	Ticket stored in Incident table.	High	Sprint-1
System	Flow Trigger	USN-3	Trigger flow on ticket creation.	Flow starts automatically.	High	Sprint-1
System	Ticket Analysis	USN-4	Analyze ticket details.	Keywords identified correctly.	High	Sprint-1
System	Classification	USN-5	Classify ticket category.	Category assigned automatically.	High	Sprint-1
System	Assignment	USN-6	Assign support group.	Ticket routed correctly.	Medium	Sprint-2
IT Agent	Notification	USN-7	Receive assigned tickets.	Notification received.	Medium	Sprint-2

Admin	Rule Management	USN-8	Manage classification rules.	Rules updated successfully.	Medium	Sprint-2
Admin	Reporting	USN-9	View reports and dashboards.	Reports generated correctly.	Low	Sprint-3
Manager	Monitoring	USN-10	Track ticket performance.	Metrics displayed correctly.	Low	Sprint-3
